Oregon State University tags are given in .eps format. Although you may not have a program that can open an .eps file, you can still insert it into Microsoft Word, Publisher, PowerPoint or any other image program. Select Insert > Picture > From File, then navigate to the desired .eps file. An .eps file is vector based, which means it can be scaled to any size without becoming pixelated.

NOTE: If you are using Publisher, please use the "CMYK" option for the closest match to Oregon State University's orange.
